Erratum to "Lexical processes in the recognition of Japanese horizontal and vertical compounds"

The published April-2017 version of this article contained an error. In Figure 3, the y-axis label for Panel (e) should be "Saccade Velocity (degrees/sec)"; it is not "Second Fixation Duration (ms)." Below is the corrected version of Figure 3.

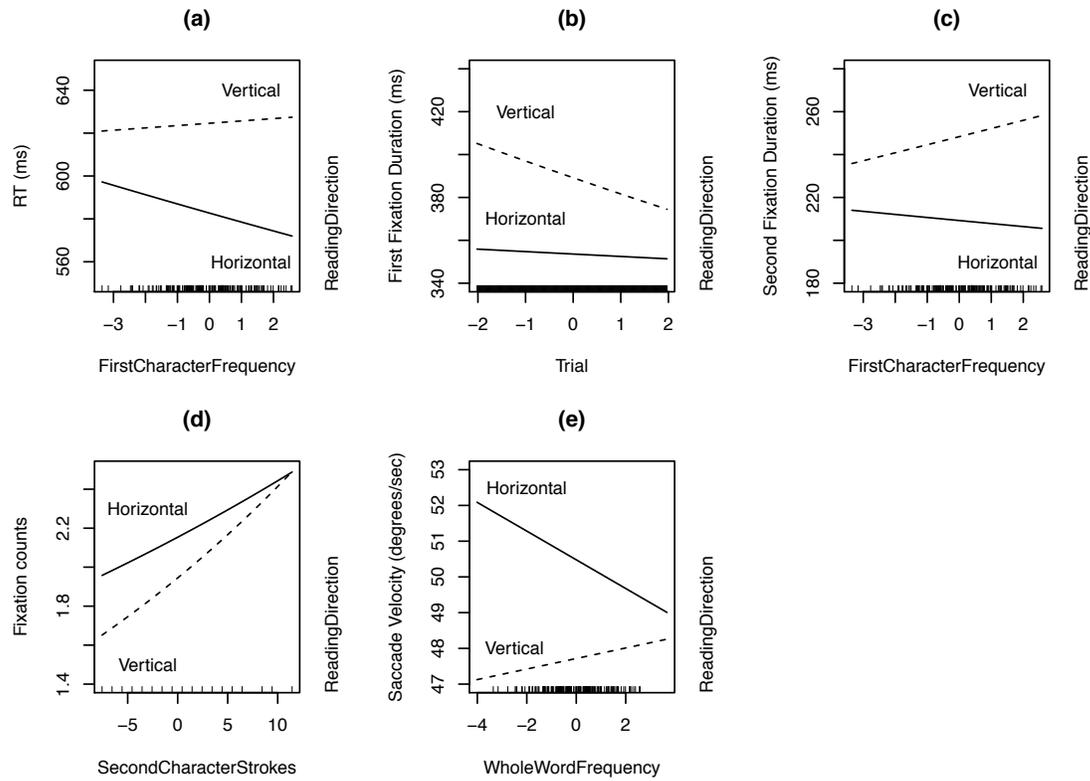

Fig. 3 Interactions between lexical predictors and reading direction observed in the mixed-effects model for response times, first fixation durations, second fixation durations, fixation count, and saccade velocity. *Note* The rugs reflect a distribution of the predictor values
